

Ítalo Martins de Faveri

Software Developer

👤 Profile

Software Developer student proficient in various platforms, languages, and embedded systems. Some of my achievements as a software developer:

- **Development and publish of an app to Play Store (app developed with Flutter and Firebase, you can find the app Page in my app link).**
- Development of a CRUD App in Flutter that interacts with my own API.(you can find the repository of this project in my GitHub link).
- Development of CRUD Screens in Java with interaction in MySQL database.(you can find the repository of this project in my GitHub link).
- Development of an App in Flutter that converts a value from BRL to Dollar using the “HG Finance” API.
- Development of an App in Flutter that searches for an address using the zip code with the “ViaCEP” API.
- Development of a responsive calculator using Html and JavaScript.(you can find the repository of this project in my GitHub link).
- Resolution of 75 logical exercises in Python developed along 3 modules of the institution's “Curso em Vídeo”.
